

This software upgrade will change the main screen backgrounds (Main menu background, Radio background, etc...) to navy blue for better viewing while driving during the day.

- What you will need for this software upgrade.
- 1 empty USB flash drive 2GB or less.

Please follow these steps carefully.

1. Click on the "**Software Upgrade**" on the Sumas website. Save the file to the "Desktop" and unzip file.
2. Copy the unzipped file to the USB flash drive (without any folders).

**DO NOT CHANGE THE FILE NAME OF THE SOFTWARE.
CHANGING THE FILE NAME MIGHT CAUSE UNEXPECTED ERRORS.**

3. Turn on the SM707DBT, once the car DVD has booted up, using the included mini USB to USB adapter insert the USB flash drive containing the software. Wait for the a window to pop-up . Then press "**MPEG**" (bottom left of the pop-up screen)

Note: **DO NOT POWER OFF THE UNIT OR REMOVE THE USB DRIVE DURING INSTALLATION.**

Doing so will corrupt the whole unit and it will not work properly anymore.

4. The software upgrade will begin. (approx. 3-5mins)
5. After software upgrade has completed, the unit will reboot. **Once the unit has rebooted, remove the USB flash drive.**
6. The back ground color should now be navy blue.

If you have any questions or problems with this software upgrade, please contact Sumas Media customer service via email (customerservice@sumasmedia.com) or via Telephone at 1-877-44-SUMAS.
