

Monitor connection

“Video 1” (RCA) – Connect to the inside camera’s Video RCA output **“Video 1”**

“Video 2” (RCA) – Connect to the rearview camera’s Video RCA output **“Video 2”**

Power input (Female) – Connect to the cigarette lighter power

Power output (male) – Connect to the inside camera’s power input (female)

Rearview Camera power

Connect the review camera’s power cable (female) to the power cable with the 2 wires (Red and Black).

Connect red and black wires to the reverse light power. (This will allow the rear view camera to turn on when the vehicle is put in reverse, and the monitor will automatically switch to Rear camera view (video 2).
